

## What is Internet Reporting?

This web-based reporting application automates the lender-placed insurance process by allowing a user to add, change or terminate hazard or flood coverage on a residential or commercial property (or multiple properties) through Proctor Financial's secure website.

## Internet Reporting Benefits

- Minimum requirement of six pieces of information to bind a property for lender-placed hazard insurance (more for lender-placed flood)
- Add, change or terminate lender-placed coverage 24/7 through PFI's secure web portal with minimal information required
- Utilized in conjunction with PFI's Mortgage Guard (hazard) and Bridge60 (flood) insurance
- Immediate binding of properties
- E-Mail confirmation of add, change or termination of coverage
- Easy-to-use application with user manual/training available as needed

Internet Reporting offers the flexibility to lender-place properties through a secure login/password at PFI's website. The user-friendly design of the program allows you to enter the information quickly to relieve the administrative burden in lender-placing a property.

## Did You Know?

**PFI offers more robust online services for lender-placed insurance through InForcer<sup>®</sup>, which has real-time reporting and insurance tracking capabilities.**
